

SAMPLE CONTAINER HANDLING WILL NEVER BE THE SAME.

Introducing...

Andwin Scientific

PENETREX®

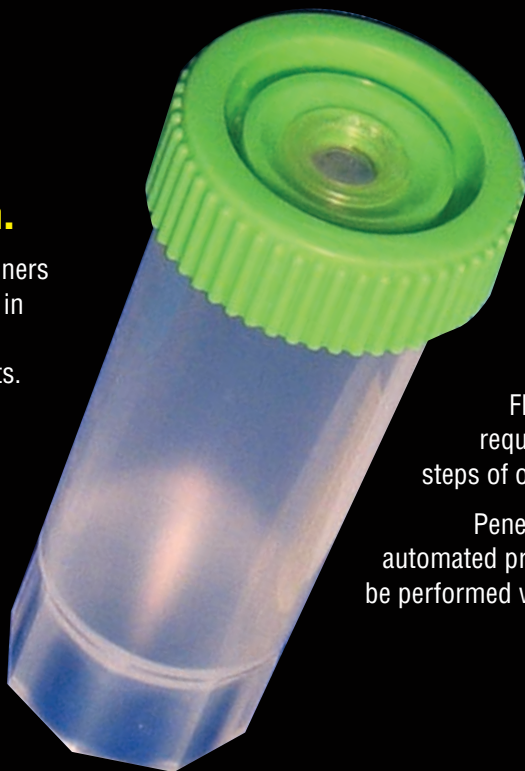

**THE WORLD'S ONLY
SELF-RESEALING
PIPET TIP-PIERCEABLE
LIQUID SAMPLE CONTAINER**

**Reduce the risk of
cross-contamination.**

Flip-top and screw-cap containers are known to splash and spill in both automated and manual sample handling environments.

With Penetrex the cap stays closed virtually eliminating the most common causes of cross-contamination.

**Cut operational steps
& double productivity.**

Flip-top and screw-cap containers require the clumsy and cumbersome steps of opening and reclosing the vessel.

Penetrex speeds through manual and automated procedures by allowing all work to be performed with the container always closed.

Contact Andwin today and find out how Penetrex can improve your automated or manual liquid handling operations.
