

DO-IT SAFE™

with SealSafe®

- Increase Child Safety
- Avoid Accidental Overdose
- Help Prevent Contamination & Spills
- Improve Dosing Accuracy
- Use with Original Child Resistant Caps

CLOSURE RESEALS AFTER EACH DOSE!

Patented SealSafe® Adapters allow oral syringes to draw the exact amount needed while reducing the risk of accidental overdose, spillage, evaporation and contamination. They fit snugly into most bottles in their size range allowing original child-resistant (C/R) caps to fit over the closures. To use, simply insert the tip of an oral syringe into a SealSafe® Adapter seal, draw a measured dosage and remove the tip. The adapter quickly recloses providing a safe and clean seal.

Not Safe! Not Safe!
